

2018 Annual Drinking Water Quality Report

Emigration Improvement District (Public Water System)

We're very pleased to provide you with this year's Annual Water Quality Report. We want to keep you informed about the excellent water and services that have been delivered to you over the past year. Our goal is, and always has been, to provide canyon residences a safe and dependable supply of drinking water.

WATER SOURCES

Emigration Improvement District's (EID) water source is from four wells. Freeze Creek well is an 8" diameter deep well that produces about 90 gallons per minute. Well #2, is an 8" diameter deep well that produces about 250 gallons per minute. Brigham Fork well is an 8" diameter deep well that historically produces up to 300 gallons per minute, but due to mechanical issues is currently offline. This source is currently rated as "inactive" and no water from this source was pumped into EID's distribution system during 2018. Upper Freeze Creek is a deep well that produces about 250 gallons per minute. The District has two water storage tanks totaling about one million three hundred thousand gallons (1,300,000 gallons) of capacity.

SOURCE PROTECTION

The EID has a Drinking Water Source Protection Plan available for review. It contains information about source protection zones, potential contamination sources, and management strategies to protect the

drinking water. The wells have been determined to have a **low susceptibility level** to potential contaminants. The potential contamination sources that could affect the production wells include: roads, and residential areas. The District has also developed management strategies to further protect its water resources from possible contamination. If you have any questions or concerns regarding source protection, contact the District manager Mr. Eric Hawkes at 801-243-5741, or Mr. Larry Hall of Aqua Environmental Services Inc. at 801-209-6382.

QUESTIONS

Currently, the District is operated by a three-member board of trustees and a manager. The water system operations are contracted to Aqua Environmental Services Inc. If you have any questions regarding this report or concerns with the water, please contact Mr. Eric Hawkes, District Manager at 801-243-5741, or Larry Hall of Aqua Environmental Services Inc at 801-209-6382. We want our valued customers to be informed about their water utility. The Emigration Improvement District has a web site at www.ECID.org there you will find the most up-to-date information and most recent District activities. The public is encouraged to attend the Trustee Meetings which are generally held on the second Thursday of each month, 7:00 PM at the fire station (5025 E Emigration Canyon Rd).
