RE: Protest of Change Application a44045 (57-7796)

Re: Protest of EID Permanent Change Application a44045 for Water Right 57-7796

We are concerned that the proposed new wells and the total possible flows from temporarily permitted points of diversion and any new points of diversion will have a dire effect on our preexisting water right (57-2966) for our residence in the canyon at 3762 E Sunnydale Ln. The creek run dry this year as reported by the SL Tribune on 9/9/2018. We have lived up here for 5 years and it runs dry almost every year. This year the lack of water had the yellow jackets going crazy because they couldn't find water. All kinds of wildlife are affected negatively because the stream dries up, and we're afraid one day the well will dry up.

We request that you deny these change applications and conduct a real and professional assessment of the impact these permanent change proposals and new wells on preexisting water rights, the ecosystem in the canyon and long-term sustainability of the affected aquifers.
