EID Trustee Meeting – August 18, 2016

ECHO President Tracy: "What is your water loss for the entire system? I.e., the difference between what you deliver to the customers and what you pump out of the ground ... so you can determine how much water you are leaking into the aquifer."

EID Trustee Chairman Hughes: "It is not a straight-line math problem."

ECHO President Tracy: "So you discharge water that you are not metering?"

EID Trustee Chairman Hughes: "There is no reason [to meter the water]."

ECHO President Tracy: "Is that is in compliance with your water right?"

EID Trustee Chairman Hughes: "Yes."
